Going Green

In an effort to make a difference for the environment and help save energy, Inter Global offers Energy Efficient Products without sacrificing features and performance.

Energy Star

Products which earn the ENERGY STAR Mark use less energy and prevent greenhouse emissions by meeting strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and the Department of Energy. With Energy Cost and Global Warming top-of-mind for consumers; Inter Global is committed to offering solutions which help consumers conserve energy and improve the quality of our environment.

Inter Global offers a wide range of fixtures which meet the ENERGY STAR Eligibility Criteria for Residential Light Fixtures. These fixtures utilize electronic ballasts and photocells. Lamp types necessary to meet ENERGY STAR requirements are on the packaging of each fixture enabling us to ship them without the Compact Fluorescent Lamps included. For a complete list of our Energy Star Qualified Residential Light Fixtures go to www.interglobal-inc.com/estar.html.

Title 24

Inter Global offers a number of complete fixtures that meet the Title 24 requirements. Title 24 lighting fixtures generally use Compact Fluorescent Lamps combined with high efficacy ballasts. Compact Fluorescent Lamps are brighter and have the added benefit of longer lamp life when compared to screw in type self-ballasted lamps. Contact our Sales Department with any questions.

Fixtures

- ENERGY STAR MODELS
- ELECTRONIC FLUORESCENT
- MAGNETIC FLUORESCENT
- INCANDESCENT
- KNOCKED DOWN OR ASSEMBLED
- LAMPS NOT INCLUDED
